The Statutes Plain Enough and Judges Sufficiently Honest to Protect All the Rights of the People.

NEW YORK, Jan. 10.-Judge Barrett, in the latter part of his decision in the sugar trust case in the supreme court yesterday, said: "It will be seen dividends are not to be declared or distributed upon the aggregate capital stock of the corporation which it is to be turned over to and held by trustees, but upon trust certificates. Thus we have a series of corporations, existing and transacting business under the forms the Yantic, been compelled ito leave Hayof law, without real membership or genuinely qualified direction, a mere abstract of the fragments of the statutory creation. Every share of stock has been practically surrendered and vital membership resigned." Speaking of the scope of the combinations, the judge said, "but they Repu did not stop there. A provision is made for the gathering in of every other existing refinery, and, in fact, four others have joined the combination since the deed was signed by the original corporations, and the evidence shows that in this country but five sugar refineries of the character in question remained out of the combination." The judge discu-sed at length the legal question, Was this a combination of cor-porations, or merely a combination of stockhoiders? and decides it was a corporstockhoiders? and decides it was a corporate combination, and says: "This combination having asked and accepted a favor of the law, it cannot complain that it is taken to task for grossly offending its letter and spirit. Fortunately the law is able to protect itself against an abuse of privileges which it grants, and while further legislation, both preventitive and disciplinates of existing wrongs is necessary verlegislation, both preventitive and disciplinary, of existing wrongs is necessary, yet there is an existing and plain law, and plain sense enough to deal with corporate abuses like the present abuses which, if allowed to thrive, and become general, must inevitably lead to the oppression of the people and ultimately to the subversion of their political rights." The judge says in conclusion it would quite unnecessarily belittle the discussion of this momentous question to consider the minor charges presented by the people. Judgment should rest upon the broad and main issue. There it rests with a sense of fitting proportion and there it should be left. After the decision was rendered the single juror who has served on the case gave a verdict for the plaintig by direction. SENATOR WOLCOTT'S ROMANCE.

A Love Affair that Bent Him from Chicago to

Colorado and Fame.

Chicago special: Hon. Ed O. Wolcott, of Colorado, who was Wednesday night minated by the republicans in the legislature of that state and will be elected as the successor of United States Senator Bowen, has had a life full of romance. He graduated at Yale college, and, having fitted himself for the law, came west and located in Chicago. He did not remain here permanently, however, and his failure to do so was due to a love affair with the handsome daughter of Judge Caton, one of the oldest residents of Illinois and the oldest residents of Illinois and a prominent member of the Illinois bar. It was a case of love at first sight. They met at a swell reception, and their subsequent meetings but confirmed the impression then made. They became engaged, but the young lady's parents forbade the marriage, and Wolcott departed hence soon after, the young lady silently mourning the hard fate to which parental discipline had consigned her. He located in Denver and is to-day considered one of the leading men between the Missouri river and the Golden Gate and the most prominent facmen between the Missouri river and the Golden Gate and the most prominent factor in the republican party of that section. His first appearance in a representative capacity was as a delegate to the republican state convention which met in the Tabor opera house Denver, 1882. He took a leading part and his speeches gave him an extended reputation. Wolcott has since been active in politics, both state and national. He is yet on the sunny side of forty and possessed of immense wealth, lives in princely style and entertains with a lavish hand. He is known as a fast friend, a gallant foe and a handsome, accomplished man of the world. The young lady who it is said sent him o Denver, the victim of parental interven-ion, is married and yet resides in Chicago.

RAILWAY RECEIVERSHIPS.

A Showing that is not Altogether Favorable t

railway receiverships constituted during a year gives a better indication of the present endition of the railway system than do

Compared with either 1887 or 1886 these figures indicate a very large increase in respect to number of roads, mileage and capital. But on the other hand the totals are very much smaller than for the years 1885 and 1884, the latter being memorable from the fact that the 37 roads for which receivers were appointed represented over 11,000 miles of lines and nearly \$715,000,-000. The most important features of the year are those of the Kansas. Missouri & Texas, 1.611 miles and \$93,000,000. Minneapolis & St. Louis, 354 miles and \$119,200.-000, Dayton, Fort Wayne & Chicago 258 miles and nominally about \$10,500,000, and Cincinnati, Washington & Baltimore with 281 miles and \$41,240,000 of securities, the last named company confessing its failure on the last day of the year.

At the present time the outlook for 1889 in respect to railway insolvency is not altogether cheerful. The heavy lorges of 1887 have seriously affected the mancial standing of many companies, and unless rails wars are prevented and legislation and public sentiment become less unjust toward railway interests there is reason to fear that the list of receivers sips for 1889 will be very much larger than for the year that has just closed.

James Bush, 13 years of age, residing in Lebannon, I. T., was shot and instantly killed by John Heed, another youth of the same age, last week. The two were playing with an old family gun that was used by Heed's grandfather in the Mexican war. Heed pointed the weapon playfully at his companion, and not knowing it was charged, drew the trigger, with the result given above. The gun was said to have been loaded at the battle of San Jacinto, and was never discharged until it killed young Bush.

Driven Away by Yellow Jack. NEW YORK, Jan. 10 .- The steamer Ciaribel, from West Indian ports, has ar-

rived. She brings the news that the Galena, Admiral Luce's flag ship, has, like tien waters on account of an outbreak of yellow fever among the crew. It appears, therefore, that no United States war steamer is left in Haytien waters, and until the arrival there of the Ossipee, which sailed a few days ago from the Norfolk navy yard, American interests in the Black Republic will be unprotected.

Are We to Have Another War? Some political prophets aver that we shall. Be that as it may, the battle waged by medical science against disease will never cease until we arrive at that Utopian epoch when the human family shall cease to be afflicted with bodily ailments. One of the most potent weapons which the armory of medicine furnishes is Hostet-ter's Stomach Bitters, which is of special utility as a family remedy, as it is adapted to the immediate relief and ultimate cure of those disorders of the stomach, liver and of those disorders of the stomach, liver and bowels which are of commonest occurrence. Indigestion, biliousness and constipation are inseparable companions, and these ailments are completely eradicated by the Bitters. But the remedial scope of this superlatively wholesome and genial medicine takes in also nervous ailments, rheumatism and kidney troubles; its action in these, as in the other complaints, being characterized by unequaled thoroughness.

This remedy is becoming so well known and so popular as to need no special mention. All who have used Electric Bitters sing the same song of praise—A purer medicine does not exist and it is guaranteed to do all that is claimed.
